

# Eko Wild Passive Capture Boma™ MODELS

2020

A series of models are available from which the client may choose the one most appropriate for his/her operation. Our advice to clients is based on factors like species of animals to be caught, expected numbers to be caught, habitat type where structures are going to be erected and whether animals are tame or wild. In the names of models letters and figures have the following meaning, for example in EW-230. EW refers to Eko Wild, the first figure refers to the number of holding pens, and the last 2 figures refer to the size of the capture funnel. Therefore EW-230 means it is a capture boma with 2 holding pens and the funnel has got lengths of canvass of 30 metres for each side of the funnel. All equipment has got standard dimensions, meaning that any model can be upgraded to a next level by just adding panels

Model numbers:		Capture system with 30m funnel				Capture system with 60m funnel			
		EW-030	EW-130	EW230	EW-330	EW-060	EW-160	EW-260	EW-360
